UAE Golden Visa holder | Available for graduate software engineering roles

Software Engineering graduate from Monash University. Seeking graduate software engineering roles in the UAE. Experienced in building React, TypeScript, SvelteKit, and Python applications across web, mobile and ML projects, with internship experience in frontend development, UAT, backend automation and agile delivery.

EDUCATION

Monash University Malaysia

Kuala Lumpur

Bachelor of Software Engineering (Honours)

06/2026

CGPA: 3.7

Programming Languages: Python · Java · JavaScript · TypeScript · Kotlin · PHP

Frontend: React.js · SvelteKit · Tailwind CSS · HTML & CSS · Figma

Core Skills: Design Patterns, Agile, API Integration, OOP, Software Testing

Databases: PostgreSQL (Supabase) · MySQL · Oracle · MongoDB

Tools & Workflow: GitHub · Vitest · Playwright · Trello · Agile / Scrum

EXPERIENCE

IT Project Management Intern @ Fireworks Solutions International Selangor

11/2024 - 02/2025

- Translated high-fidelity Figma prototypes into responsive web interfaces, collaborating directly with the design lead to ensure pixel-accurate implementation and consistent UI across all deliverables.
- Authored and executed UAT scripts to validate functionality, identify bugs and confirm client acceptance criteria were met.
- Developed backend automation scripts that reduced manual workload, supporting API workflows and structured data pipelines.
- Assisted project planning, milestone tracking, and cross-team coordination in a fast-paced, client-facing agile delivery environment, proactively raising blockers and adapting to shifting requirements.

ACADEMIC PROJECTS

Final Year Project: Phoneme-Informed Speech Impairment Classifier

06/2026

Python · wav2vec2 · PyTorch · librosa · TORGO Dataset

- Improved speech recognition performance for dysarthric speakers by injecting pitch and MFCC acoustic features into wav2vec2.
- Achieved a 72% relative reduction in Phoneme Error Rate ($0.527 \rightarrow 0.147$) across all 15 dysarthric speakers in the TORGO dataset; statistically significant (Wilcoxon $p = 3.05 \times 10^{-5}$).
- Conducted an ablation study across 5 model configurations to isolate each feature's contribution.

SEMS2 Student Experience Management System (Monash University)

10/2025

- Used by Monash clubs & societies to manage events (discover $\rightarrow$ register $\rightarrow$ feedback $\rightarrow$ certificates).
- Built the role-based web app (Student / Organiser / Admin) with SvelteKit + TypeScript + Tailwind and Supabase (PostgreSQL, Auth, Realtime); Google OAuth restricted to @monash.edu.
- Delivered organiser console (create/draft/edit, registration windows, Google Sign-Up/Feedback links, reminders) and admin workflows (EMS No/Link approvals, reports, CSV/XLS exports).
- Established testing (Vitest, Playwright), release cadence, and UAT; designed the initial Figma hi-fi prototype.

E-Commerce Platform - Astone

07/2024

- Led as Product Manager in a year-long team project to develop a full-stack e-commerce platform.
- Designed high-fidelity UI prototypes in Figma and built the front-end in React.js for a responsive user experience.
- Implemented back-end services using Django and connected to a PostgreSQL database to manage user data and product inventory.
- Deployed and hosted the application on Vercel for seamless online access.

NutriTrack - Clinical Nutrition Insights App

06/2025

- Built an Android app in Kotlin with Jetpack Compose for visualising clinical dietary scores.
- Applied MVVM architecture with Room DB for persistent, normalised patient data.
- Integrated Retrofit for FruityVice API and Google Gemini (GenAI) for contextual nutrition tips.
- Implemented multi-user authentication and a secure admin dashboard with HEIFA analytics.

ACTIVITIES AND LEADERSHIP

Monash University International Student Services

Treasury & Engagement Department

02/2025 – 06/2025

- Managed budgets and coordinated logistics for international student events with 500+ attendees; authored risk assessments, EMS bookings, and financial proposals.
